

If I am paying for a private radio broadcasting system, which is XM Satellite Radio, then why should XM Instant Traffic & Weather be cancelled? That just goes against common business practice and promotes some form of communistic system which the individual does not have the right to choose what he or she wants to listen to. As a loyal XM Radio listener, I believe that one has the right and privilege to listen to whatever they want to listen to especially when they purchase such service. Maintain our democracy and the right to choose especially as a consumer, for this country should always been what it has been doing: practicing freemarketing. G-d bless the USA!!!
